

## MFS HEPA

Certified HEPA filters for fine filtration and polish filters in industrial or commercial settings.

MFS HEPA offers a simple and cost effective clean air solutions for commercial and industrial processes in schools, laboratories, dental offices and factories. The filter frame can be mounted directly to walls, beams, counters or in drop ceilings saving valuable work space. The inlet can be directly connected to extraction arms or hoods used to capture contaminant at the source. Integral fans or duct connect directly to the filter outlet allowing air to be recirculated or exhausted outdoors when necessary or regulations require.

The modular design allows the full range of MFS filters to be grouped together to expand capacity or filtration capability for small and large operations. Options and accessories are available for automated operation, improved service and reduce sound level.

- Easy to install, operate and maintain filtration solution that can be mounted almost anywhere.
- Certified H14 HEPA filters offer excellent efficiency for harmful contaminant.
- Modular design, inlet / outlet options, accessories and filter options adapt to unique requirements.
- Innovative filter design for effective filtration and reduced exposure during service.
- Recirculating clean air where allowed versus exhausting saves energy and reduces operating costs.
